The Energy Transition in Hawaii: Focus on investments in people and projects

The Hawaii Energy Conference brings together regional and national experts on energy policy, strategies, leadership and innovation. [Join us](#) as we explore how to invest with knowledge and respect in Hawai'i.

“The Hawaii Energy Conference provides a vital service to our state by convening policy-makers and stakeholders to discuss our energy future. As we all work together to help Hawaii stabilize and recover from the Covid-19 pandemic, it is especially important to embrace innovative technology, policies and regulation within the renewable energy sector, which will help protect our natural environment, shielding our island state from volatile world fossil fuel markets, strengthening its overall resilience, and aid in its economic recovery.”
